Profile:

I'm an AI-driven creative professional with a background in Textile Technology and extensive industry experience, combining practical product knowledge with a passion for emerging AI technologies. After completing a bootcamp in AI-driven software engineering, I've continued self-learning and developing web-based applications with AI assistance, exploring ideas and building my technical skills through hands-on projects. I also run a children's YouTube channel, where I create AI-generated illustrations, animations, music videos and engaging visual content. I enjoy experimenting with new AI tools, discovering better workflows and turning creative ideas into practical results. My strengths are my curiosity, adaptability, attention to detail and willingness to learn, experiment and improve.

Key Skills:

- AI Image Generation & Visual Content Creation
- AI Video Generation & Animation
- Creative Concept Development & Visual Storytelling
- Prompt Writing & AI Workflow Optimisation
- AI Tools Research, Testing & Adaptation
- Video Editing & Content Production (Canva, CapCut)
- AI-Generated Music, Voice & Text-to-Speech
- Digital Content Creation for YouTube and Online Platforms
- Product Visualisation & Visual Quality Control
- Basic Web Application Development Using AI-Assisted Tools
- LLM and Generative AI Fundamentals
- Creative Problem-Solving & Independent Learning
- Attention to Detail & Quality Assurance
- Project Coordination & Professional Communication
